

Software Solutions for the Fresh and Processed Food Industry

75470 080

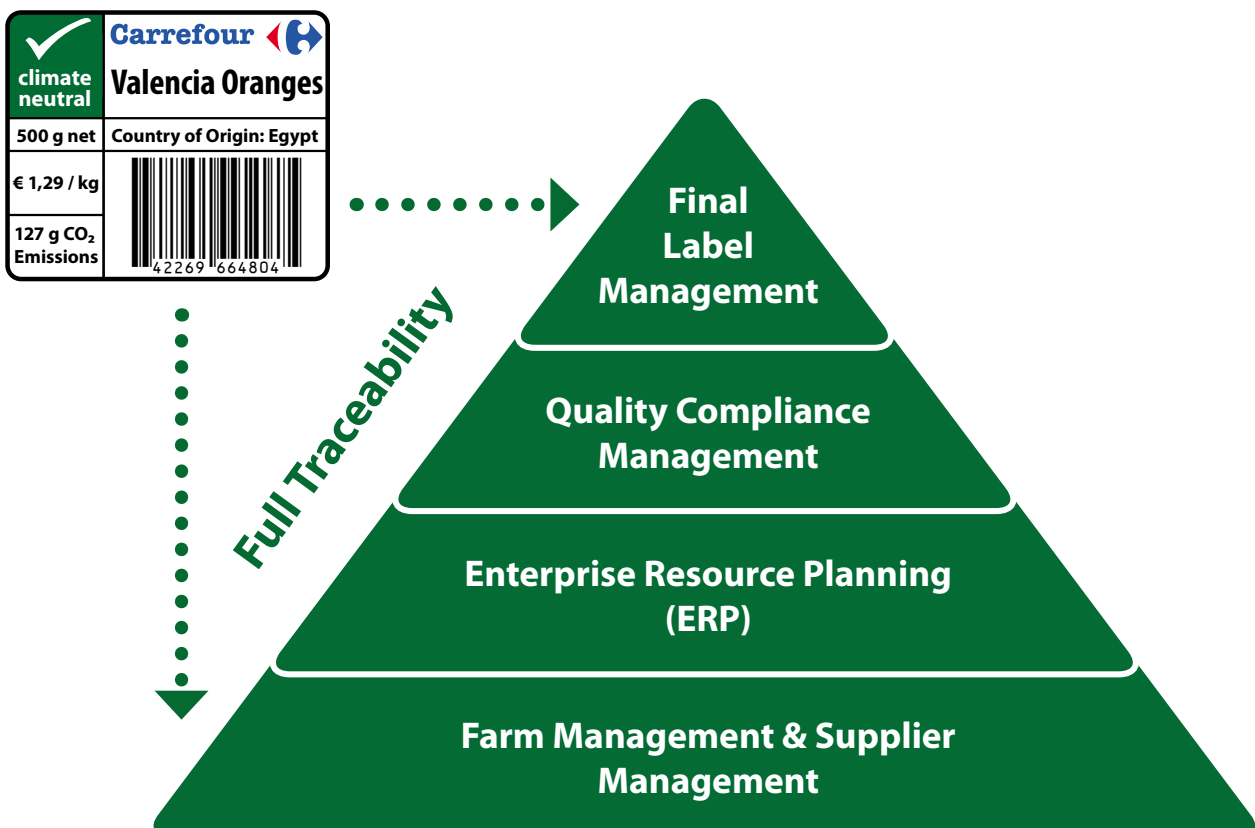

ABOUT US

Salis IT Services combines a wealth of experience in the global food industry with a thorough understanding of the business logic of companies within this sector. Our clients are companies that grow, process and retail fresh and processed food. Our product portfolio is designed to cater for current and future needs and challenges within this highly regulated sector such as quality compliance and performance improvement.

As the international food industry is increasingly putting companies under higher performance and compliance pressure, we are helping all stakeholders involved in this industry to handle the upcoming challenges by means of state of the art software applications and hardware infrastructures.

We are helping our clients in improving their business performance by implementing Enterprise Resource Planning applications (ERP) that are tailored to the needs of companies situated in the fresh and processed food industry. Furthermore we offer special applications for quality compliance management and full product traceability from field to fork. Thus we cover the whole cycle from cultivation through production till the dispatch of the final product to the end consumer.

Salis IT Services has formed cooperation with Muddy Boots Software (United Kingdom) and Netsis (Turkey) bringing together proven international food industry know-how and in depth understanding of business applications coupled with local IT technical services to develop the Middle East marketplace.
